

Google Image Search

Posted by ykuser - 27 Feb 2012 02:19

This is the first time I post so I hope to do it in the right place

I was working with multiple different products including K9 and OpenDNS blocking gstatic.com with both the first page of the search images showed the images even when clicking girl inappropriate images shows at the first search page, and we all know you cannot block the images section without blocking Google search, how do the other products deal with this including Jnet and the other suggested solutions..

I think you need to check your K9 settings. I know if I try to do a Google image search it gets blocked.

May I also suggest that you get webchaver this may prevent you from doing an inappropriate image search in the first place.

By the way Welcome.

Welcome! YkUser

[Click Here](#) to learn all about this wonderful site and everything it has to offer you!

Great step you took by posting here, we hope you stick around and KOP [if you stick around you'll figure out what that means ;)].

Around here we all have the same story, our souls cry inside of us, but we have accustomed ourselves to block out that cry. Today we can begin to be who we really want to be.

helpme!, if we cannot discuss or debate solutions then let's not suggest any, the fact is that this is a problem if you cannot deal with it that I'm suggesting for you not to use search altogether otherwise this should be discussed and then have everyone make the own decisions, isn't the whole point of this place to discuss those problems and solutions.

I am asking everyone to check this problems and to publicize the details with what solutions you

are using so we can help others.....

The need to testing a filter is usually atzas hayetzer hora, because the testing doesn't stop until the filter fails and which point many people will themsevels fail. So no, don't have everyone check the problem and publicize the details. If you feel that you have a problem with your filter contact the filter gabbai he is pretty update with problems and solutions.

filter gabbai, who is this I would definitely like to talk with him as I need this for others, so if he could help I would give it a try, K9 is there a setting to block Google images, I personally don't think so as I checked it out myself but let me know if I am mistaken.

I will definitely have a talk with them I actually e-mailed him, but to all of you if you are trying to break free why are you searching besides for example k9safesearch.com, why don't you block all other searching options?

permit me to say a few words please.

the word ???? does not mean to beat or hit. it means to blunt.

the word 'shinav' can be understood as coming from the shoshon 'shinav', which means different.

so we can say that when we encounter someone who seems or professes to be exclusive, different and removed we should 'blunt' the 'differences' between ourselves, show him how we are all human, and prone to similar tendencies, each in their own way.

(this is an effort to blunt the slight militancy of the hakheh ess shinav post by my esteemed colleague TZ)
