

Filter For Mobile Internet

Posted by SoHard,YetSoRewarding - 31 Aug 2009 01:24

Since I don't have a computer at home, the only shmutz available to me is on my mobile phone, save for the rare occasion where I do have regular computer access.

So, does anyone know if there is such a thing as a mobile internet filter?

So far I've come up empty-handed.

Thanks, Reb Guard.

It's ironic how I used to mock my non-businessmen friends that had a blackberry and really didn't need it. I practically vowed to myself that I wouldn't obtain a Berry until I absolutely, positively need one, and didn't see myself needing one anytime soon. Little did I realize that I indeed absolutely, positively need one. ASAP!

Thanks again, Guard.
