

Back on the Site

Posted by strugglingguy - 28 Jan 2014 04:08

---

This is my first time back on the site in a couple years. I have been busy... I have had good stretches and bad stretches. Currently, I have been struggling. Today (after a couple classes) I felt I needed some "relief" so I looked at some P. I told myself I needed it and there was no stopping myself on the comp. (I get ar.d. the filter w a proxy). So, that is that...

I'm going to go now - continue with this later...

I assume that was for me

I'm sorry this conversation got a little heated - yeah I was talking about a burning bush

Guys please go back to my original post to struggling guy on this page - I don't really understand why I should not have written to him what I did

please explain

I agree with you that the taphsic method doesn't seem to be helpful enough to be featured so prominently on the site. Maybe the webmaster knows something we don't (HEY GUARD, if you're reading this then we'd love to hear what the deal is).

I was just saying that just because something isn't working for someone doesn't make it not a tool. It may even be that it's a good tool for him and he didn't use it properly yet. I don't know of any way of knowing if a tool is going to work for you other than through trial and error.

I'm not sure what your criteria for a gye tool is but if someone is getting helped from a cumulative count (I don't know of anyone who did) then he should probab;y continue using it.

As far as filters, they aren't there to stop us from acting out. They're there because our gedolim say to have them. They also usually serve as a deterrent at least for me. I know a way around my filter that hasn't been fixed even though I've reported it. It still helps me since it's a pain in the neck to exploit it.

Hi everyone

thanks for your comments on taphsic, I only did it for a week.

moving on, I had a fall this morning (first time in a couple weeks), even though earlier in the morning i was able to keep my phone away - this time i could not.

I have the gye books in front of me as well as gye chevra on my phone to text. problem is i text them too late most of the time. (there have been a few battles won though, recently).

any help or chizuk is appreciated.

i will try to move on and have a good productive day IYH...

I wish you too a productive and successful day

Keep in mind that the successful guys (see "Free Towing" page below), primarily don't use their phones when they feel pulled into the mud. That's a time to protect your phone. They use their phones primarily to live life, and the more you can do that - the more productive your day will be ;-)

Make it a great one!

I turned my phone's wifi off (a small stuff but hey...)

maybe i should turn it off fully when I am at home, but i might miss a call or text from work.

I have the covenant eyes browser so I have been using the iPhone's search app/news to get around it. any way to uninstall that? i am doing a google search now for it...

I disagree. I use my phone to call people all the time. Especially when I'm down in the dumps.

Shlomo - That's the primary use of your phone?

There is a way to turn it off I. The settings but you can always turn it back on. What you could do, I think, is give someone like your wife the restrictions passcode (meaning she makes it up) and restrict access to that.

That's only if you think this will help and not cause you to go crazy which these things sometimes do

I have an iPhone 5

I looked online for how to disable search and it said you couldn't do it. How can you set the restrictions password to combat "search" and "news" - ?

It's not the primary purpose, but it is the main purpose of my phone. It is a great tool for my recovery.
