I preprogrammed the number in to my phone (pin included with a "wait" beforehand), and it always goes smoothly. Maybe it would work for you too.

Thanks!

I never new about this "wait" function.

To phone in here from Siberia I have to enter no less than 4 different codes and numbers so this is a true piece of gold.

you taka look like you're freezin' in that picture.

How do you access this "wait" feature?
