Today's world is so busy with the "I", ipod ipad iphone.

If you still use a flip phone, take a moment to give yourself a pat on the back.

So finally they came out with the "WII" problem is that it also has two I's

Very nice and cute

the piece I loved the most is:

And maybe that's the reason that they call it an Iphone.

My favorite line:

You can keep those vids

I'll take my wife and kids

Can't wait to sing this tonight by the table after Koh Ribon, unless my kids are tired of hearing

"Just one Shabbos and we'll all be free" of our phones.

How about we institute one shabbos a year that the Chazan sings Lo Sevoshi to the tune of Kulam Ahuvim (aka The.IPhone.Song), Please sing along

You guys are the true kulam ahuvim!!

If the chazan sings it tonight, I'll know it's you. Don't worry, I'll be so happy to have you as a live chaver, I'll introduce myself.

Hey Eslaasos, its on the GYE website [HERE](#)

- since before we joined gye?

Maybe we should arrange a kumzitz? You'll sing 'cos you know the lyrics, Bigmoish can do the boom-pa's, Kedusha will install the apps.

Cordnoy will serve Coffee, Watson English tea - who will tell all my Facebook friends?

Warning: Spoiler!

AND WE'LL HAVE A BLAST!!! (like Kedusha's profile image)

For all those that had to buy a new iPhone due to the song, don't forget to install it once again

Im looking forward ;-)

I have an iPhone

All Apps (web too) are well restricted

There was 1 system built app that has inappropriate stuff. I don't want to disclose here what app it is, you have it and may not know what I'm taking about specifically. Let's keep it that way. I didn't slip with it in recent history, but is impossible to remove it or filter it myself, and has been haunting me (more about it another time)

I just called TAG and they told me good news if I come in they should be able to block it

If it's reliable, I'll let you know, and whoever wants details then will have to email me

KOT!
