

ANYONE in Need of a PASSWORD???

Posted by aaron - 09 Nov 2009 20:33

Wanted to install k9, but too confused or embarrassed to ask for help?

Here is the answer to your prayers.....

I've discovered the greatest way to spread k9 web protection

easily, without embarrassment and for FREE!!!!!!

Using a special, easily installed, free program called crossloop, I (or anyone in the forum for that matter) can help install, make a password or alter k9 web protection.

I myself am more than willing to help anyone who wants this set up. I'm frequently online so I make a great partner to help others who need it to be bypassed. I check my mail frequently and am more than willing to help anyone who wants it set up.

Basically, all you do is download the program. E-mail me about what time you want it installed and we'll meet on the website together.

Easy, no?

The website is called www.crossloop.com/ipage.htm?id=predownload

My email is extraemail564@gmail.com

Feel free to visit my website helpmestop.weebly.com to other tips, advice and support.

I have much experience with k9, its settings and how people usually fall with it. I am happy to give recommendations in terms of settings to all who seek them.

I love GYE and couldn't thank them enough. That is why I feel such a strong need to give back and what better way than spreading k9?!!!!!!!!!!!!

Give it a try why wouldn't you? ??? ??? ???

Aaron, this sounds interesting. Thanks. Have you seen the instructions on [this page](#)? We use "ShowMyPc" to help people make adjustments... Is your plan better? I'm not sure I understand how this works... Maybe you should work together with our filter Gabai at filter.gye@gmail.com?
