

Talking to my children...

Posted by persistent - 03 Apr 2016 23:15

My son is currently going to public school and will be Bar-Mitzvah next year. How do I "break the ice"

and "innoculate" him BEFORE he is exposed. I do NOT want him to struggle as I did even though I am

on the road to recovery. Have already looked at the teen resources on this website but I am open to

any other/specific suggestions anyone may have. Thank you very much.
