

filters

Posted by 18Shmira - 09 Jan 2017 01:42

Hello everyone, i hope to be returning soon, but for now it would be great if I just get help with these two issues:

1) If I recall correctly, the internet sichos I have been to have recommended to have both a filter and accountability program on ones computer. However, I don't know how to do this. Apparently, the filter I was directed to by TAG doesn't work with accountability programs, and they couldn't direct me towards one that does.

2) I am looking to get a new phone. Is there one that anyone recommends as the easiest to deal with?

To anyone who knows about this stuff, it would be great to get some feedback here or a PM. thanks so much.

Welcome

1) Presumably Tag's filter will supersede Accountability needs

Accountability is to my chavrusa and then I setup my own filtering that I can play around with - dependent on my moods :-)

2) I have experience with iPhone and with Tag's support it's smooth driving
