K9 not working when tethering internet thou phone
Posted by stayrein - 10 Jan 2017 02:43

_____

Please help!

For some reason when I tether internet through my phone, it does not filer the internet.

Can someone please troubleshoot me?

Thanks

_____

That's a good phrase "troubleshoot me," for "me" indeed is the problem, not the phone, filter, tether or computer.

Have you tried callin' TAG?

Hi Welcome aboard,

_____

Your phone is probably connecting to it's service provider via IPV6 which can cause issues with filters. Usually you can force your phone to use ipv4 either by creating an apn profile or through the settings.

What type of phone do you have?

Tag should be able to assist you.

Welcome back

Have you become a BB since you were last on gye?

_____

Yeah, its me that needs the troubleshooting.

I have come to realize that no filter in the world can really do the job.

I have not called TAG.

I will call them.

Thanks

Hell of a post!

IfI only others would learn to write and think like this.

_____

Thank you,

Are you saying that TAG can help me do the above mentioned stuff? would I need to go in to an office?

Can I do it myself?

Thank you

_____

Do you know a better filter than K9 that I could download?

Thanks

I have white list. My wife has the restrictions password.

So maybe do the same and have someone hold it for you

In any case what do you need in life besides for Guardyoureyes.com and the gye video site. That's it nada

_____

I will call in the morning when they are open.

Wondering what I can do until then.

I will have to wait and see.

Thanks

You can put your phone away and go to sleep.

Or you can have the MarkZman come over and shoot your trouble.

These guys are always aiming for my guts!

_____

Update:

I have called TAG and they say that there is no solution for the MAC.

I am back to square one. If anyone has a suggestion for me, I would appreciate it.

Perhaps jewishfiltergeek can explain how to tweak my phone.

Thank you

Are you able to write me in an email, usin' English please, what exactly the problem is, and what TAG told you?

ThankI you
