

Can't remember filter name

Posted by xyxorwa - 14 Mar 2018 22:37

---

There is a filter that I'm pretty sure I have found in the past through the GYE site, somehow. It may not be directly on GYE, but some link got me to it. I can't seem to find it now.

If I remember, it is web-based, so it doesn't need software installed on your device. It's a subscription service and it blocked (automatically??) image hosting sites, like Google Images.

Does anyone know what I'm talking about and can steer me towards it?

Thanks

Are you talking about the square above this post that says 'filters'? It's on almost every page of gye. Between the 'tools' tab and the 'articles' tab.

Venishmartem.com

That's prob not it though...

I think it probably was through Venishmartem, but I don't see the one I was thinking of, at least not with the features I remember. (Maybe it's my memory proble...)

gentechsolution.com night be what you are looking for. It is a paid subscription. They install the software on your computer (remotely), and you have no access to any settings to change them. This worked the best for me.
