---

I'm trying to find a website blocker that i can use on microsoft edge because that has worked on my phone but can't find one for it. The other option is to figure out a way to stop microsoft edge. ideas?

On pc? Or Mobile?

are you on the new edge which is chromium based?

If yes, then you can install Chrome Extensions as well.

Also, if it is just a matter of blocking, you can use the hosts file to block a list of sites.

Hatzlucha!
