How to fight against the simple placer
Posted by eduthewriter - 03 Oct 2021 10:10

_____

Hi! B¨H I didn't entered in a porn web site in the last... 4 months! But, that doesn't mean I didn't watch pornography. Because of my work, I need to use Twitter a lot and sometimes I just refresh the page and it appears almost naked woman. Suddenly, once, a friend liked a porn video and I discovered a lot of Twitter accounts that offers porn content.

I'm struggling SO HARD to not visit them...

What you all recommend?

_____

Block twitter. Thats what I did, Twitter is cesspool, besides a big timewaster. I know it's hard, it took me a long time till I took the jump, I (thought I) needed it for buisness, and I was also soooo dependent on it to feel connected and know what's going on. It's been a half a year and I dont miss it.

_____

I installed a filter that has an option to block any images with skin color and option to block all images all together

_____

I do see that there can be a twitter filter. Alternatively

1 a keylogger or accountability program

2 Is there a way on twitter that everyone can automatically see what you look at, or some extension to like/retweet whatever video/post you click on?

Can you block all images completely? assuming that is the issue. Or make a rule with yourself to share one post form every twitter user you visit.

?Do you need to read twitter for your job, or just post? What if there is a way, I think there is, of viewing twitter in a different, text only, unappetizing format?
