

Book Regarding Discussions with Children

Posted by stevec613 - 29 Dec 2009 20:23

I remember a post about a new book tackling the issue of teaching children about the birds and the bees from a Torah perspective. I am wondering if anyone can pint me in the right direction.

Thanks

SC

Thanks Reb Guard.

With my children getting into the double digit ages, my wife and I are considering when and how to begin having these discussions.
