

Kosher video site, so you dont have to use youtube
Posted by growingbytheminute - 19 May 2024 21:34

Hi,

I created a website/service called [KosherYidden](https://KosherYidden.com). I think it will be very helpful for GYE members. It provides a filtered environment to browse from channels from Youtube. I created a list of kosher channels from youtube, and the videos are displayed on the site ad-free, without ever having to go on youtube.

Kosheryidden.com

Please let me know what you think GYE community, and share with you friends if its good.

You can contact the filter company to allow Youtube Embeds, if you want. But if you have youtube fully blocked, then I wouldn't suggest changing anything. I'm still not sure if the filters are able to allow a certain site, you can ask.
