

PLEASE HELP! TRAPPED IN GOOGLE DRIVE

Posted by clarity26 - 07 Feb 2025 09:43

Unfortunately some files with inappropriate content were shared with me and I can't remove my access to it!!

Also even if I block the one who shared it with me you can't watch the videos but all the titles remain!

Also its easily accesible by just unblocking the person!!

How can I permanently delete this access off my Google drive

Please help!!!!!!!

Shalom Brother,

Perhaps I don't understand, but why are you not able to delete these files?

You generally can't delete shared files - only the owner can.

R' Clarity, [HERE's](#) a link to google help that describes how to remove them. You should just be able to right click on the file and hit the "remove" option. If that doesn't work, [THIS](#) help question suggests "Drag and drop to trash folder then removing them from trash worked for me."

PRO TIP: Get on the phone with a GYE chaver to keep you honest while you delete them so

Hi thank you sooooo

much for the reply

I tried this!

However i discovered that even when I put them in trash they are searchable with the title! And don't go away!

Please please continue to advise me this is an emergency maybe we can chat live and you can please guide me to get this resolved??

Did you delete them from the trash bin?

** edit: I tried deleting two things. One is gone, the other is still searchable as you describe.
Hmmmm

Right!

It only gives option to remove from view!!

Ok, I think I got it.

If you carefully go to the file information details, you can click 'manage access' and remove your own permission to access the file, then the delete is permanent.

Please reach out if you want to try it together.

Updating with feedback from Brother clarity26: If you don't have permission to manage your access, you can report the file and that seems to remove it.
