

TECH HELP!

Posted by Sturggle - 06 Mar 2010 19:12

So, back in the day,
when I was young and wild,
times that I cannot
and do not want to recall,
I went on Skype with a
slightly inappropriate screenname.

I have looked into how to get rid of it,
but to no avail, have not found a solution.

On erev Shabbos, a friend signed into Skype

from my computer and exclaimed,

"What is that? Weird! Oh my!"

I made it seem like I

also thought it was strange

and I think it would be difficult

for him to believe,

so that was that

and neither of us brought it up after.

We spent the whole Shabbos together.

So.....,

any suggestions

from the oilam?

One last thing,

GUT VOCH!

Delete skype from your computer and if you need it then reinstall it. That should get rid of the list of old skype names that were used.

Yiddle, I tried and it didn't seem to work.

Anyone else have any ideas?
