You're only human, Hashem understands you're trying. Don't get down on yourself, that's dangerous. As long as you're still in the game, even if you have repeated falls - there's still hope and you are doing great things! But the moment you let dispair in and start to give up, you let yourself slip away and all can be lost!

I think Hashem prepared for you the Refuah before the Maka. Just today, [this entire page](#) was written. Start from the top and read all the way down through the bottom. I'm sure it will help get you back up!
