

Help! -Practical Knowledge

Posted by trying123 - 31 May 2010 03:47

This thread is for anyone in need of practical knowledge.

I am need of this:

I need a filter that will block everything except for a handful of sites that I need (i.e. a white-list).

Can this be done with K9?

Is there any other software that can do this?

I am desperate....

K9 can do this! If you want right now I'll walk you through it.

Yes Thanks...

(only thing is that the Filter Gabai has my password...)
