

technical problems

Posted by ToAdd - 04 Mar 2011 06:21

---

Hi,

Who do I contact about technical issues on the woh?

Its not just the wall of Honor. It's the entire Homepage. Now I'm also having issues with PM.

Guard said that they are working on it.

Working again!! ;D ;D ;D ;D

Although I did notice that it had been reset to the day before.

My technical issue isn't that it's not working, it's that it is very vulnerable to hacking.

There's security flaw that needs to be fixed.

Than speak to Guard about it, he is in the midst of overhauling the website.

Database Error

Please try again. If you come back to this error screen, report the error to an administrator.

Back

Does anyone else ever get this when attempting to use their PM function (View their Personal Messages)?

I get those pages sometimes also. I think it is a slip and not a fall. If you get a PM from across the mechitza that would be a fall.

---

When attempting to keep abreast of a certain situation these messages can get extremely annoying!!

[Guardureyes](#)Did it happen again? It's a weird error and may be more server than software issue[/quote]

[\[quote= wrote:](#)

It must be the server, it comes and goes... I don't know what to say.
