this is my vort. Yosef told his brother ????? ????? ????? now the torah is always truth, so what is the truth in yosef's accusation? the answer is that yosef went through the ????? of ????? in Mitzrayim and that paved the way for the other yidden that would follow. but only if they accept his leadership. So he was saying to them "so far you haven't accepted my leadership - so if you come down to this land which is ????? then: ????? ????? ????? - you are bound to fall to the ????? that is so prevalent in this land. that's it, folks. We must accept the leadership of GYE, or else ????? ????? ?????

the point of this vort is that when one is in an area where there are ????? we must always look for ????? and that's what yosef was telling them, without me you are lost because of the ????? here, and it's amazing that they left ????? completely pure that the Ribono shel Olam testified on their families that no Egyptians were mixed in.

Rav Nachman of Breslov teaches that the main test is to pass the test of lust. it destroys this world and the next, what is left of it? terrible memories, imaginary desires that will never be fulfilled, the power of imagination consumes his mind and heart with a foreign fire. he is completely consumed by that which is nothing, an image, a reflection, no real pleasure and he ends up feeling fooled and humiliated and so filthy....
