

The cell phone is what is getting me

Posted by Tilly and Teddy - 30 Jun 2011 16:27

Ok guys so I just signed up, I want to break free. I hate doing it, I normally end up sleeping in the next morning and don't daven properly, i.e after the zman and without a minyan or some crazy late minyan, 11 am onwards. Not what I want to do.

The first thing I want help with is has follows.

Just after last Succos I admitted my problems to one of my rebbe's in yeshiva and he helped a bit, and thanks to a couple of them I have installed K9 and webchaver on my laptop, so when in my bedroom I don't have such easy access. However I have a symbian operated Nokia cellphone and just use this instead, and as you know it provides access to enough material of good enough quality to allow me to access what I want to.

Does anyone know how I can block access to porn on this cellphone, because I can't get K9 or webchaver on it. I'm sure blocking my access would have a huge helping effect for me. I feel that I just need the cellphone and do use its features for work and generally so I can't get rid of it. Also getting rid of it would be embarrassing from a social perspective and I feel that haskafically it is not the phone in the wrong but me so I don't see why I should get rid of the phone.

Please someone help me block access from my Symbian operated Nokia cellphone.

Thanks

=====

maybe you want to edit the hosts file to filter stuff

PlatSec World (S60 3.x onwards)- go to this location C:\private\10000882\hosts

Or

Pre-PlatSec World- go to this location C:\system\data\hosts

post back

Fine we are all with you. Especially in tech support. As as your tech support team, I can say that it is unlikely that you will find a filter for symbian

I didn't know you were our tech support team ;D

But it sure sounds like you know a lot... We'd be happy to have you on-board as one of our "techies"... If you'd like to help, contact filter.tzvi@guardyoureyes.org and ask him if you can join our team...

Wow guard, it is great to hear from you! I meant that I was an unofficial member, due to my

I will email tzvi to talk about joining the team.

Shavua Tov, and I hope that you have continued success in the new website.
