

I'm new and need help with PHONE!
Posted by foreverandever - 02 Feb 2012 15:43

I'm brand new here.

I need a cell phone with email.

I researched a filter for my Blackberry for a while, and could only find one from Jnet for \$7/month which also required Blackberry Enterprise Systems, for \$20 a month.

So I got rid of the Blackberry because someone told me that the Droid has a Parental Control App. Well, the app will not install on my phone to save my life. I tried bloqer.com, and that would not install either. I installed McAfee Family Protection, but it appears to not be doing any filtering whatsoever.

I desperately need a FILTER ON MY PHONE! Are there any good options out there?

I know the iphone can have K9, but due to my phone plan, it would cost me \$500 to buy an iphone through Sprint, which I cannot afford now, especially knowing that an iphone really costs \$100.

Please, please help me find a solution for my phone!

Norton just released 'Norton Safety Minder' for Android. It's a Web Filter with Monitoring, and it's FREE goo.gl/JVN4C

have a friend set it up and keep your password

Good luck

you must use the smart app lock for android to lock the Norton as well.

market.android.com/details?id=com.sp.protector&hl=en
