

Mobile version of the forum?

Posted by What Should My Name Be? - 11 Dec 2012 12:58

---

I was just wondering if it's possible to make GYE available in a format that is more 'mobile- user friendly'?

It would be easier to use on phones and iPods etc...

I'm actually using it on my iPhone with K9 browser right now. It's kind if teeny but it works. The chat doesn't work though, it always shows 0 users even though I can see people on when I look at it on a computer.

The old forum had a WAP version that it defaulted to if you log on using a mobile device. I can't find it on this new version yet.

I would recommend emailing Guard about this.
