

worth reading till the end

Posted by geveirael - 30 May 2014 01:42

Professor : You are Jewish, aren't you, son ?

Student : Yes, sir.

Professor: So, you believe in GOD ?

Student : Absolutely, sir.

Professor : Is GOD good ?

Student : Sure.

Professor: Is GOD all powerful ?

Student : Yes.

Professor: My brother died of cancer even though he prayed to GOD to heal him. Most of us would attempt to help others who are ill. But GOD didn't. How is this GOD good then? Hmm?

(Student was silent.)

Professor: You can't answer, can you ? Let's start again, young fella. Is GOD good?

Student : Yes.

Professor: Is satan good ?

Student : No.

Professor: Where does satan come from ?

Student : From ... GOD ...

Professor: That's right. Tell me son, is there evil in this world?

Student : Yes.

Professor: Evil is everywhere, isn't it ? And GOD did make everything. Correct?

Student : Yes.

Professor: So who created evil ?

(Student did not answer.)

Professor: Is there sickness? Immorality? Hatred? Ugliness? All these terrible things exist in the world, don't they?

Student : Yes, sir.

Professor: So, who created them ?

(Student had no answer.)

Professor: Science says you have 5 Senses you use to identify and observe the world around you. Tell me, son, have you ever seen GOD?

Student : No, sir.

Professor: Tell us if you have ever heard your GOD?

Student : No , sir.

Professor: Have you ever felt your GOD, tasted your GOD, smelt your GOD? Have you ever had any sensory perception of GOD for that matter?

Student : No, sir. I'm afraid I haven't.

Professor: Yet you still believe in Him?

Student : Yes.

Professor : According to Empirical, Testable, Demonstrable Protocol, Science says your GOD doesn't exist. What do you say to that, son?

Student : Nothing. I only have my faith.

Professor: Yes, faith. And that is the problem Science has.

Student : Professor, is there such a thing as heat?

Professor: Yes.

Student : And is there such a thing as cold?

Professor: Yes.

Student : No, sir. There isn't.

(The lecture theater became very quiet with this turn of events.)

Student : Sir, you can have lots of heat, even more heat, superheat, mega heat, white heat, a

little heat or no heat. But we don't have anything called cold. We can hit 458 degrees below zero which is no heat, but we can't go any further after that. There is no such thing as cold. Cold is only a word we use to describe the absence of heat. We cannot measure cold. Heat is energy. Cold is not the opposite of heat, sir, just the absence of it.

(There was pin-drop silence in the lecture theater.)

Student : What about darkness, Professor? Is there such a thing as darkness?

Professor: Yes. What is night if there isn't darkness?

Student : You're wrong again, sir. Darkness is the absence of something. You can have low light, normal light, bright light, flashing light. But if you have no light constantly, you have nothing and its called darkness, isn't it? In reality, darkness isn't. If it is, well you would be able to make darkness darker, wouldn't you?

Professor: So what is the point you are making, young man ?

Student : Sir, my point is your philosophical premise is flawed.

Professor: Flawed ? Can you explain how?

Student : Sir, you are working on the premise of duality. You argue there is life and then there is death, a good GOD and a bad GOD. You are viewing the concept of GOD as something finite, something we can measure. Sir, Science can't even explain a thought. It uses electricity and magnetism, but has never seen, much less fully understood either one. To view death as the opposite of life is to be ignorant of the fact that death cannot exist as a substantive thing.

Death is not the opposite of life: just the absence of it. Now tell me, Professor, do you teach your students that they evolved from a monkey?

Professor: If you are referring to the natural evolutionary process, yes, of course, I do.

Student : Have you ever observed evolution with your own eyes, sir?

(The Professor shook his head with a smile, beginning to realize where the argument was going.)

Student : Since no one has ever observed the process of evolution at work and cannot even prove that this process is an on-going endeavor. Are you not teaching your opinion, sir? Are you not a scientist but a preacher?

(The class was in uproar.)

Student : Is there anyone in the class who has ever seen the Professor's brain?

(The class broke out into laughter.)

Student : Is there anyone here who has ever heard the Professor's brain, felt it, touched or smelt it? No one appears to have done so. So, according to the established Rules of Empirical, Stable, Demonstrable Protocol, Science says that you have no brain, sir. With all due respect, sir, how do we then trust your lectures, sir?

(The room was silent. The Professor stared at the student, his face unfathomable.)

Professor: I guess you'll have to take them on faith, son.

Student : That is it sir ... Exactly ! The link between man & GOD is FAITH. That is all that keeps things alive and moving.

P.S.

I believe you have enjoyed the conversation. And if so, you'll probably want your friends / colleagues to enjoy the same, won't you?

Forward this to increase their knowledge ... or FAITH.

By the way, that student was EINSTEIN.

With greatest respect to you and that cute story I highly doubt that story ever took place for a number of reasons. Besides Einstein did not believe in the type of God that we believe in.

Ah kasha oif ah maisseh!

Einstein did not believe in the type of God that we believe in.

There's a story told by Rav Noach Weinberg Zatzal, that he met someone and asked him "Do you believe in G-d?"

"No" he answered "I absolutely do not believe in G-d!"

"Neither do I!" said Rav Noach, "so no harm then if we talk then"

"Oh Rabbi come on!! - you're the famous rabbi who is always trying to convince everyone to believe in G-d, and now you're saying you don't believe in G-d yourself??" So you're just a fraudulent hypocritical farce then!!"

Let me explain", said R' Noach,

"Can you tell me about this God, which you say you don't believe exists? and of which you say I'm always trying to convince others to believe in??"

After telling R' Noach all about his perception of "GOD" - R' Noach says to him "That's exactly the "GOD" which I just said I don't either believe in"!!

Professor : **According to Empirical, Testable, Demonstrable Protocol, Science says your GOD doesn't exist.**

Shivisi Responds:

This is an outdated argument!

Science has already disproven the previously assumed theory that "unless you can perceive something with one of the five senses it does not exist"

There are many scientifically proven things in lie which exist but we cannot see,taste, smell,hear, or feel.

As with many scientific studies, this theory is no longer the accepted axium of the scientific world.
