First of all, thank you for your service. It is a big benefit to a lot of people and you should continue your holy task.

Second of all, what can a graphic artist do if he needs pictures and graphics? For example, one who googles "camel" "jpg" gets pictures of camels and ... inappropriate pictures. Is there a service which surfs the net for frum people and finds only appropriate pictures?

Use a website that has stock images for a fee and pass the fee on to your client. Tell them that although many people use copy written images, it is against the law.

If you can't pass the fee onto your client you can probably take the money off maaser. (Ask you rov. I once heard from R' Avrohom Schorr that you can use maaser money to take the bus instead of walking if ino rder not to spend time in the streets during the summer)

Welcome,

What is troublin' you?

What brought you to this site (other than your question of how to filter)?

Is that your only issue?

Check out the links on this site for available filters and stuff like that.

Anyways, welcome and we are lookin' forward to hearin' more about you.

WELCOME!

I hear you, i also need to get pics and videos. There are safe searches but we will always have this problem not matter what. I guess just be careful!

Bing.com has a image search with strict filtering you can find it in the options or settings. It's not perfect but It cuts out 99 percent of the shmutz.

Use a website that has stock images for a fee

These websites also have inappropriate images.

Perhaps there is a non-Jewish co. that will surf for us. One would tell them that he needs a particular image (jpg, vector, photograph, etc.) and they would send several examples to choose from. One would pay them a fee. Or perhaps one would be over ????? ?????.

Welcome again,

I and others have said on this site several times: For some reason, none of us went to a website forum and asked for assistance how to download pornography for free, how to search for inappropriate images without paying for them, and for much worse as well. We wanted to find it and we were successful.

v'hameivin yavin.
