I think you answered your own question.

Yes, it does feels weird to do something new. Are you prepared to feel weird for a short while in order to stop acting out for a long while?

It's a funny thing about SA. People are so desperate not to go. They'll be prepared to try all sorts of things, like quitting their job and moving into a synagogue, but not SA. Not the one thing that has a proven record of success.

I know a guy who was so desperate to stop acting out he locked his member in a chastity belt but when I suggested SA he said "I don't need SA, I'm not insane. I'm fully in control!"

Oh you are? Where's the key to your chastity belt?
