Need some filter help
Posted by kr - 17 Sep 2015 13:35

_____

Hi

These things are not exactly my personality but here goes.

I am 30 years old, married, three kids. On to the internet. I like many others work from my computer and need internet. I've had trouble for a while but I have also pushed myself and had many clean periods my problem is eventually slipping and then getting in to a little bit of a rut.

What I want out of this? Simple, besides some much needed chizuk I need somebody computer savvy to help me with a filter (I am willing to pay them). I have K-9 but it is not so good. I need some specifics (I will explain to this person what they are). I've tried numerous times to get a better filter but have not been successful as I am fairly computer challenged.

I appreciate any and all help. May it be a zchus for you and this entire program.

Thank You

_____

are you willing to pay for a filter? there's a good router-based filter called clean router

_____

Did you call TAG?

_____

call TAG, and if not i'm sure you can find the instructions of how to put the filter on, you will need someone else's participation though, it's a password based filter
