Simple Filter that works...
Posted by persistent - 01 Apr 2016 03:48

_____

Thank you for allowing me to be part of a group and to get some tips.

I have windows7 with Internet Explorer 10 + Google Chrome.

I need a simple filter that does NOT allow one to delete history.

Is there such a thing? If so, could someone please let know.

This will definitely cut down my laptop viewing. Thank you.

_____

Welcome

It sounds like you're looking for a reporting system like Webchaver I'd think
