Hey there everyone.

I'm not actively struggling now. Just savoring the satisfaction of pressing the "still clean" button for yet another day. Working on building the resilience for when I need it most, the knowledge that I am a good guy with problems, not a broken clock that's right twice a day...

Wishing you all much ?????!

Hey there.

Haven't been keeping up for awhile. I've basically been logging in to update my chart whenever I fall...

I decided that I want to take a more proactive role in dealing with this issue, as I am beginning to dread navigating shidduchim with this issue in the not so distant future...

My plan right now is to restrict my internet usage to filtered devices, as opposed to not using internet at all, (which I have tried in the past, with dismal results...it's just unavoidable). I have a whitelist filter which is great, but there's one loophole which I need to close.

Looking forward to sharing my journey with all of you.

It's great to be back!

Back to square one.

Got to come here before I fall. Not just after...

We daven "vhaser soton milfaneinu ume'achoreinu" -- and remove the opposer from in front and behind us. GYE as well is good before and after a fall :-)

Relapsing is like falling off a horse- the best thing someone can do is get right back on again!

?We are standing behind you and cheering you on in your difficult struggle... Please keep us posted on your progress and we hope to hear good news!
