You already sound like a pro... There's nothing better than getting started and really committing to you journey. If you have already, then GYE is the place for you. Read some articles, listen to some shiurim, go to your personal home page.... Do whatever works for you... See what you like

For or beginging though p, theres in my opinion no better place than the forums, so keep us posted on how your doing and ask as many questions as possible... We've all been through, or safe going through... This so its the support we give each other that lifts us up.

and look into it deeper.

Just know now we're here for you.
