

k9 filter

Posted by joe999 - 04 Jul 2010 09:54

Hi, This site is really inspirational and there are some very special people on it.

I posted earlier about me being home for the summer and my parents having unfiltered internet access. I realize there is no way I am not going to succeed without a filter. I was wondering if the k9 filter only stops p***graphic websites or others as well? Is there a way for me to install the filter without the need for a password?

K9 has a whole list of options of what you can block, if you so desire you can select the "Block pornography only" option. They are pretty good in general.

You can have the filter gabbai do the password, and if for some reason you need access to a website which is blocked - contact him and he can check it out and unlock it for you.

(I can't find a direct link to the gabbai, I guess just pm guard or one of the administrators).
