Hey I'm a new guy and want some help with iPhone
Posted by Needhelp5760 - 17 Aug 2010 07:47

_____

I've got the iPhone and want to disable safari so I can use a filtered browser but the one I downloaded (mobicip) just isn't up to par with safari. Anybody have any suggestions. I know Alef beis of stopping is restricting ur access but I just can't do it if I have such an inferior browser. Any help would be greatly appreciated.
