controlling the websites out there
Posted by s4nh - 05 Nov 2010 14:06

_____

Educational site have .edu

organizations and learning stuff is usually .org

some sites are .net others .com

why cant we make a petition or something to force pornsites to be put under .po or something.

this would allow us to have more control and filters would be much easier to handle!

is this possible?

why cant we make a petition or something to force pornsites to be put under .po or something.

Because then it would be too easy for us to find when we're feeling weak!

_____

Not if all sites from such a domain were blocked by the filter.

_____

When I first heard about this it seems so pashut - make it mandotory that all adult material must have a special domain name to protect the children (and us addicts). Unfortunately were dealing with a muti millionaire industry to the economy so it's not going to be an easy fight.

_____

The basic point here is valid, but the main focus needs to be on controlling OURSELVES...

We can't, nor will it solve the problem, to control what is out there.

_____

We can't, nor will it solve the problem, to control what is out there.

We need to set up effective gedarim <u>and</u> control ourselves.

Not if all sites from such a domain were blocked by the filter.

We'd find a way around it.

But actually, it would be more dangerous. There are things out there just as dangerous that aren't officially p*rn. If all serious p*rn was restricted to www.xxx, we'd feel perfectly safe using facebook, etc, etc. We'd NEVER listen to anyone who told us not to use them.

Sort of like that story (or is it a gemara) about someone who wished for one mouth for worldy matters and another one for Torah. He realized, at least with one mouth, you've got to try hard to keep it pure.

I know I'm paraphrasing and messing this story up, but the point is nevertheless a valid one.
