

Blackberry/Smartphone help

Posted by FreeEyes613 - 04 May 2011 19:24

---

Hi- I don't know if this is covered elsewhere on the forum but I can't find it. I have a blackberry curve (older one) and I have yet to find an internet blocker or filter (I need email for work but not web). Can anyone help or recommend a smartphone that can give me email and. Block/filter my web? I have Verizon so within Verizon would help! Thanks a ton!

Ben

you can remover the browser so the email would work fine and you will not be able to surf the web. send a email to [deletebrowser@gmail.com](mailto:deletebrowser@gmail.com) and they'll send you a program to delete the browser.

Whoa! Cool! Two questions-1) are you sure that works for my curve? I've deleted service books and they've come right back.

2)Once its deleted, will the program prevent me from getting the browser again?

Thanks

from chizuk email 986

What can I do to filter my Blackberry?

There are now three different choices of things you can do:

1) Send an e-mail to [deletebrowser@gmail.com](mailto:deletebrowser@gmail.com) and we'll send you a program to delete the browser (e-mail still works fine).

2) If you need the Browser, you can use Jnet-Mobile with the Enterprise server of Verizon.

3) NEW! Use an accountability program to insure you stay clean. E-Blaster Mobile is now available for Android and Blackberry.

If you have any trouble, contact the GYE Filter Gabai at [filter.gye@gmail.com](mailto:filter.gye@gmail.com).
