I've asked this before....

Are you aware of any filter for Windows Mobile 6.5?

I'm being a good boy, have not used my phone inappropriately for the past 4 months. And I made a kabala that if I do i will get rid of it and get a plain voice-only phone even though it will be a big inconvenience for my work. But I still would be more comfortable with a filter on it.

Gevura!

there aren't any filter that i know of for win mobile , check out

www.mobizim.com/

www.mymobilewatchdog.com/ see here the win phone manual
www.mymobilewatchdog.com/support.shtml

www.mobile-spy.com/purchase.html

maybe this can work as well, idk www.opendns.com
