block porn solution
Posted by korben - 16 Dec 2018 22:18

_____

hello all ,

what work for me :

1) for pc I use blue coat K9 Web Protection (work very well and free)

2) I ask my wife setup admin password ....

3) on android I setup a opendns ip address :

DNS1= 208.67.222.123

DNS2 : 208.67.220.123

Searching solution to block vpn on opera browser....

Why block vpn on opera when you can just use a different browser?

OpenDNS family shield isn't perfect, glad to hear it works for you. How do you set your dns server? Is your phone rooted? I would like to know how to do it on unrooted phones. I don't think it is possible.

If your phone is rooted you can use other options as well.
