

Dopamine Fasting

Posted by future paltiel - 29 Sep 2022 23:37

---

Greetings fellow GYE users.

Do some of you know the right steps to make a proper Dopamine Fasting?

It will be greally appreciated.

It's simple. You just avoid the things that give you a dopamine boost for a period of time, like:

-music

-sugar

-alcohol

-games

-movies and tv series

-social media(Instagram, Facebook, TikTok, youtube, etc..)

-ejaculation

-and the greatest thing for dopamine fast is guarding your eyes (no looking at any woman's body, not even on television, only you can look at your wife),

Would you consider the GYE forum as social media?

Your answer is in your question. Just don't do the things that give you a high shot of dopamine for a week or two.

What else is there to do?
