_____

hi everyone

i need help

i need to modify my filter (k9)

i dont have the password but i can get it from the filter gabei

i'm really scared to death that once i'll have the password i'll do ...and...and
even...

but i need to modify it, in fact to restricted it even more (set a time limit)

i have accommplished so much

i just cant afford it

help help

any ideas?

thanks in advance

_____

No need to stress out about this, the gabai will be able to do all settings for u, if u wana let him connect to u via remote

_____

i dont know exactly how that works

also my wife uses the computer as well

would she be able to see that ANY1 connected here

(sorry i'm off, i have no idea about thais remote stuff!)

im browsing here and then deleting my history (IE InPrivate)

thanks

_____

Just contact the gabai and he'll guide u

Hatzlucha

Ur wife won't see anything that was changed if she doesn't have the k9 password

_____

Does anyone know how to make the OpenDNS filter block Google Image (pischa shel Gehinnom) searches? I checked the box but Google gets through.

Thank you in advance,

BB

_____

K9 now has an option that you can block any site without the password. However you need to add this option using the administrative panel, it will let you paste a favorite button on the favorite bar. Then when you need to block a new site you just click that button on the browser bar. Hope this helps
