Testin' the New Editor
Posted by cordnoy - 07 Feb 2016 18:21

_____

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me:
thenewme613@hotmail.com.

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.

2. the "source" button needs to be explained.

3. the "quote" button on mobile version needs an overhaul.

4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code
Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: http://tiptipa.org.il/template/img/benefits-2.png) and sometimes it doesn't (like this IMAGE:http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:
color=#FF0000**?? ??? ???? ???? ?"? ??? 2 ????? ??? (120 ?????) ????**[/color]

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

The system is not behaving now - This post not breaking yet for me and I gotta get back to work...

You mean the system **IS** behaving, no?

_____

Does that Dov quote I mentioned on the previous 2 pages work?

Can you quote Dovs post?

_____

Some users claimed in the past that when they try to switch from source to regular, the content disappears.

_____

I have a ?

1) What's the deference between source to regular?

2) How can I quote form one thread to another?

Thanks in advance.

"**EDITING POST**"

As mentioned previously on this thread, When submitting the post I may go back and forth from source to regular, often on the 3rd or 4th time that I re-**Submit**, go back to regular, or to source - all the editing content **disappears, and** when I hit "Quote" all the content **disappears**

Please try quote this post HERE

It was edited 6 weeks ago and is still un-quotable

_____

[Markz wrote on 07 Jul 2016 14:39](#):

Hi Shea

"Chat" on Mobile

1) When the device is turned sideways (from portrait to landscape) the chat jumps to the 20th last message, and doesn't remain on the last message

2) A mobile user who is online on gye cannot see the chat, and should not show on the chat page that he is on the chat, unless he's actually on the specific Chat page

Problem #1 is even worse tonight on my holy iPhone.

Even when I open the chat on portrait it jumps to the 20th last post, and not the most recent

Oh I see you fixed landscape view to work right, so I guess that caused portrait view to get

_____

broken, although it was working fine till today

Anyone else see the same?

Thanks in advance.

1) Source is where the code for the text is shown, (eg bold words have b and /b after)

2) click 'quote'. Select all. Copy and paste

Typing in source view is ok. And when I view source on the previous post it shows a new paragraph for each letter like so:

"

M

e

t

o

o"

Mark did that already.....several times.

He pointed you to the posts.
