Testin' the New Editor

Posted by cordnoy - 07 Feb 2016 18:21

_____

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me: thenewme613@hotmail.com.

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.

2. the "source" button needs to be explained.

3. the "quote" button on mobile version needs an overhaul.

4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code
Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: http://tiptipa.org.il/template/img/benefits-2.png) and sometimes it doesn't (like this IMAGE:http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:
color=#FF0000**?? ??? ???? ???? ?"? ??? 2 ????? ??? (120 ?????) ????**[/color]

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

_____

Many captains on this forum have a link in their signature that is **broken**, eg the GYE FAQ. in cordnoy's and Skep's signature

GYE Handbook | Gibbor's Insights | GYE FAQ- Thanks Skep and DMS123456789

(Alcoholics Anonymous)Big Book | White Book

A similar issue occurred in November '15 when https//guardyoureyes.com/forum/recent

which I had booked marked as my gye '*home*' pagewas changed to https://guardyoureyes.com/forum/recent/recent, and it was **broken**

An error page should not happen!

Can we please setup a simple protocol for important pages - I'm sure kenuna has this capability

It's called a '301' to rewrite the URL

Thank you Yaacov, Shea, and all the testers and Devs!!!

_____

Sometimes links get changed, what can we do? For example, the FAQ link changed now to guardyoureyes.com/resources/faq because we moved it from under the "Home" on the menu bar, to under "Resources".

_____

3) When on chat I put my phone to vibrate so others (eg wife) don't need to 'hear' my conversation

All other apps vibrate but the chat still rings - Loud (and I don't like to change the general volume just for the chat. Vibrate should suffice, but it doesn't work for the chat... yet

My dev responded:

We can't define if phone is set to vibrate. We can disable sound instead, if you want. Should we do it?

I tested this on my phone and I found that indeed the volume of the chatrooms is seperate than the phone volume. So even if the phone is set to vibrate, the beeps will still happen. However, the solution is simple. You just need to turn the volume down when in the chat window to zero and you won't hear the beeps. Is that a big deal?

However, the solution is simple. You just need to turn the volume down when in the chat window to zero and you won't hear the beeps. Is that a big deal?

That is a big deal

When I go onto gye I often set my phone to vibrate. I will not remember to turn the volume back up when going out of vibrate mode with 1 click, and may miss calls if my ringer is off

I never change my volume levels - If I need privacy I set to vibrate. So lowering the volume for the chat isn't an option for me

I'm not such a frequent guy in the chat. So for me this isn't such a big issue

fyi, the "Recent posts" page, is different on PC than on my iPhone. On mobile all buttons eg reply are shown. On PC not

On mobile, the bottom right circle with the question mark is really annoying because it gets in the way of typing.

_____

Chat issues:

Recent chats are not being saved in the chat history.

I can open the chat in the browser on my phone, it only freezes occasionally. The public chat
works OK, in the private chat I can see what people write to me but whatever I write never gets
sent.

Also I notice that the usernames in the public chat thread are no longer clickable.
