Testin' the New Editor
Posted by cordnoy - 07 Feb 2016 18:21

_____

We thank Guard and his team for updatin' the site and the editor.

There are many new features to make it easier.

There are, however, still kinks as well.

In this post, there will be a list of questions, suggestions and error reportin'.

As a thread goes on, the post gets lost.

Accordin'ly, I will be doin' as follows.

If you have an issue, question, answer, comment, or whatever, email it to me: thenewme613@hotmail.com.

I will then add it to this post.

All other posts on this thread (other than Guard's) will be deleted, for it will not be orderly, and then it will not get fixed.

Thank you

1. the "quote" feature needs to be fixed.

2. the "source" button needs to be explained.

3. the "quote" button on mobile version needs an overhaul.

4. the "spoiler" button has been removed. Guard's note: We used to have a button for "Spoilers". It inserted the code
Warning: Spoiler!

. We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: http://tiptipa.org.il/template/img/benefits-2.png) and sometimes it doesn't (like this IMAGE:http://f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1)

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

9. Tried to attach file - didn't work

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone.

12. When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that?

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code. For example:
color=#FF0000**?? ??? ???? ???? ?"? ??? 2 ????? ??? (120 ?????) ????**[/color]

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

This post will be constantly updated.

Thank you

What happened to the GYE regular app. It's a real pain getting to the Forum through this newsletter app.

Not to mention the "back key" on the android basically shuts down the app.

New format also stinks, not karming anybody no more. No day count etc.

Marrying off my first child this week, so very busy... But we'll get to all these things soon IY"H.

What do you mean "What happened to the GYE regular app?". The app seems to work for me.

You don't see karma and day count on mobile cuz it takes up too much of the screen space. Anyone have suggestions for that?

Get outta here! That's awesome!

Mazal tov!, Go have fun, ill live with this for now. I should survive.

Many, many brachos to the new home.

MAZEL TOV!!!!!!!

Hey if you need Sheva Brachos Torah, there's some good schoirah in the JHF Section, and I can always help you out just give me a buzz

Markz, with all due respect,

I wouldn't rock the boat with the mechutanim off the bat.

Hi Guard, First of all, Mazel tov. May you get much Nachas.

Second, I would suggest for mobile, just doing Karma. The day count could be added later on like this: I.E.user   shmulyz18
      longest streak   5 days
      current streak   2 days
      blank   blank

Yesod, i was wondering the same thing. It was really annoying getting in from the chizuk email. Then i realized that there are two gye apps. We both downloded the chizuk app. You can get the regular app from the link at the bottom of the chizik email.

And a belated MAZEL TOV to the.guard. are we all invited?

Significantly older? ?

That says 1970 not 1790

1970 isn't the birthdate, If you're 25 when writing, then your birthdate 1945 and you're 70+ ok?

Yeah, so I should show you more respect...

_____

[markz wrote on 21 Feb 2016 20:48](#)**:**

cordnoy - here's my take on every single point you had mentioned

I kept your words in gray and re-sorted your numbers, and put the important stuff first

A] QUOTE - fix date="

1. the "quote" feature needs to be fixed.

20. quote inside a quote, breaks the quotes.

There's a new piece added to the quotes which is breaking all the quotes and that is date="

It's a nice thing to have, but when it doesn't pull in the date correctly, the quote falls flat.

B] POST - EDIT / QUOTE (breaks)

24.On PC: When I hit "Quote" on this post [HERE](#), all the content disappears

22. On PC: Posting regular reply: When completing the post I may go back and forth from source to regular, often on the 3rd or 4th time that i go back to regular, or to source - all the content disappears

25. On PC: 'Quick Reply': If editing tools are applied the post often wont 'post' when 'submit'ed, rather just dissapears

C] "SPOILER" Button - revert

4. We used to have a button for "Spoilers". It inserted the code Warning: Spoiler! We can still do this in the SOURCE, but it would be nice if we could have a "Spoiler" button in the editor as well please.

D] INSERT IMAGE /FILE - revert "attachment" source brackets

5. the "insert image" has disappeared. Guard's update: When I insert an image, sometimes it works (like this IMAGE: tiptipa.org.il/template/img/benefits-2.png) and sometimes it doesn't (like this IMAGE:f.a7.org/Resize/pictures/180x120/608829.jpg?&autocrop=1)

I tried the 2nd image - it works now

This will work in "attachment" source brackets - As I manually input the source HERE

9. Tried to attach file - didn't work

26. I no longer can insert an attachment into the body of a post. There used to be an "Insert" button next to the attachment path box, it's gone now. [Some can attach, but it does not embed.]

This will work in "attachment" source brackets - As I manually input the source HERE

E] Reply - Speed Load Time

16. The red arrow doesn't show up right away after a quote on mobile. It takes it about 4-5 second to load. There is a delay on regular site as well.

F] POST - EDIT mobile

21. Mobile- when all text is selected, the last rows of tools aren't available, as they're covered by

the "copy - cut - paste" mobile header.

G] TABLE - borders

11. Inserting a table works in preview, but when posted it disappears (no borders show). Also when pressing EDIT it is gone. Apparently this has been fixed, However

Table without borders - the borders cannot be removed (Border size = "0")

As I tried HERE

_____

LOW PRIORITY   - IMHO

2. "Source" Button: Explain

12. "Quote" Button: 'WROTE' (When I use the "Quote" button in the editor to manually create a quote, it puts the word "Wrote:" on top of the quote box. Can we remove that? UPDATE: this still does not work)

15. The editor tools in mobile take up 5 lines. Please make sure the tools fit into just 3 lines.

Currently shows 4 - Its ok

10. What would it take to make the e-mails of posts (when a user is subscribed to a thread) to include the formatting? (Right now it comes as code).

13. The yiddish site is showing me BOTH editors. The old one AND the new one!

14. People who are subscribed to a thread on the Yiddish forum get an e-mail with the message filled with code.

They all know english (tell them this is an anonymous website - their shvigger won't know that they're here, and you can close down the Y website, or they should learn code ;-)

_____

FIXED__ Im not experiencing any issued with these mentioned below

3. the "quote" button on mobile version needs an overhaul.

6. the "strike thru" button is not workin'.

7. Can we make everything work in "quick reply" and we won't need "full reply" anymore? This would include both rows of editing tools as well as "attach file".

8. If we do 1 above, remove the "Quick Reply" button and leave only the "Reply" button, but change the functionality of the Reply button to the functionality of Quick Reply.

17. I want to select a word on the mobile to add formatting to it (bold, link, whatever) but it doesn't let me select the word. Please make it that if user double clicks on a word, it selects it (like it works everywhere else on phone).

18. On iPhone - If I hit quote on thread one and want to copy it to a different thread, and hit reply on thread #2 and paste it there, it usually doesn't display correctly.

19. If I hit quote on a thread, there's no option shown to reply below the quote UPDATE: this might be only for I-phone, as the other mobiles have that red arrow thingy show up after you click below the quote.

23.On PC: Regular 'Reply' takes a few moments to load, longer than was previously

Irrelevant - as this button has been removed

27. Spell check missin'.

28. The writin' below the "quote" is very shaky, even on PC.

The 2nd point is a little frustrating for me, and may cause my post count to skyrocket quite quickly, because i often make changes in source, and submit and re-editing too many times it locks the post for me (and did my signature too), and the only solution is to simply delete my post and redo, as I just did, so I have 3 post count for 1 post...
