Bugs & Issues - Please report here
Posted by Markz - 28 Sep 2016 02:57

_____

Ok guys this is a serious thread

I have a close rapport (*shuychus* in yiddish) with **the.guard** and the tech support team, and he requested that if anyone has any issues, they should please post it on this thread, and I will try pass it on promptly

1. **Important**: Please specify the 'bug' with as much detail as possible.   e.g. what device you are using, where you see the issue ~~what mood you were in, which bug spray did you try~~, and so on. E.g. "Chat on my Mobile Device (Specify what model) there's this blue chat circle...
   Warning: Spoiler!

          "
2. **Update**: Reply here after you see the issue is resolved on your end.   So I can report that the bug is successfully [vanquished](#)

Question: If this thread is serious, why is it on the "Just having fun" board?

Here's the 1st

Cordnoy wrote: After clicking spoiler, it takes the cursor to under the box

Issue #2. On PC it shows a spoiler button, but on Mobile it still shows a little square with 4 boxes

Sometimes, on iphone, as I'm typing the letters don't show up. I see my predictive text appearing on my keyboard, but I don't actually see the letters appearing on the screen.

Thanks!

I've had that too - and it's frustrating

Is that only when you are writing in a "quote" post which is usually longer, or also on a standard "reply" post

_____

On iPhone, when quoting something, many times the quote doesn't get processed and it comes out as one long plain text with code written out.

Test iPhone 5.

Shlomo what iPhone have you got?
