Ok guys this is a serious thread

I have a close rapport (*shuychus* in yiddish) with **the.guard** and the tech support team, and he requested that if anyone has any issues, they should please post it on this thread, and I will try pass it on promptly

1. **Important**: Please specify the 'bug' with as much detail as possible.   e.g. what device you are using, where you see the issue ~~what mood you were in, which bug spray did you try~~, and so on. E.g. "Chat on my Mobile Device (Specify what model) there's this blue chat circle...
   Warning: Spoiler!

   "
2. **Update**: Reply here after you see the issue is resolved on your end.   So I can report that the bug is successfully vanquished

I had the same issue. It's in iPhone also. What you have to do is scroll up and then click the drop down menu and select what you want.

Not exactly a solution. Especially if you're in the middle of a thread and want to go back.

We should really get a forum app like tapatalk or the way other forums have with offline support, subscribed feeds, notifications on followed users or threads. Et all...

Mark, are you using the app or viewing the site in a browser? I know it works ok in a browser, I think he's complaining about the app.
