

ANTI GYE

Here's the deal:

We've all developed styles and personalities that most have come to love (or hate, maybe at the same time), but sometimes it's hard keeping up appearances and we may just want to relax a little. So post here but ONLY *dafka* relinquishing your secret style facade and turning a new leaf (or just reverting to your real life, boring persona)

+1 for each conformity,

-1 for each infringement

For example,

Singularity:

-1 for any reference to anime, pokemon or dragonball Z (my signature popping up each time may count as a fall, but that should be discussed in the *poskim* first) also any 12-step catchphrases. I'd better work it!

Make up your own rules. Here are some recommendations to add to the mix:

Cordnoy: -1 for any omissions to the *g soo'fit*.

Markz: -1 For any cryptic messages that take some time to chew on.

And general Infringements:

Any mention of a truck, chulent, or alcoholic beverage, perhaps in some type of combination as well, fields a -1. (Do we apply *greira* or -1 for each absurdity?)

What's a +1? Avoiding all pitfalls and making a sincere post of sincerity.

Ready?

Go!!

Hello, gentlemen. It's mighty fine weather we're experiencing currently.
