

Halacha Q&A

Posted by goldwings - Yesterday 06:01

If someone walks over the international date line and skips a day, does he also gain a day on his 90 day chart?

Assuming he does, when he walks back over and loses a day, I don't think he would lose a day on his chart, because he **was** x amount of days clean.

If so, I think GYE should make a trip to the international date line and we all should walk back and forth, until we're 180 days clean!
