

Need Accountability Partner

Posted by 01 - 16 Aug 2022 05:11

Fell after 70+ days

Plan to install accountability software (again)

Need someone willing to actively follow up with questionable content - otherwise the entire setup is 100% pointless

Know that, for the better or for the worse, I am extremely knowledgeable in computers, and you might get seemingly innocent-looking reports, but be aware, read between the lines, and feel free to text me.

If you're interested, please DM me, and I'll provide some way of getting in touch. (Probably a weird looking email address, worry not, it don't bite)

And just to give an example of what I mean when I say "extremely knowledgeable" (which I will agree sounds like I'm just trying to show off): someone once asked me to help them with their phone and I **remotely** removed a paid filter from their phone - in about 30 seconds.

Thank you!

What would you recommend between Truple and Accountable2You (or something else), and why?

Thanks!

NOTE: I have **Mac** and **iPhone** (and an Android too, but that's easy), and **Apple** is known to make it trickier for all these kinds of apps to work, all in the name of privacy, of course...

well, well...

Could I ask if you really NEED the iPhone and Android phones? Having unlimited porn in your pocket all day is quite a challenge, and if you are tech-savvy, there isn't a filter that you can't get around. The best filter is not having the phone in the first place. I only comment because I have an iPhone for work that is unfiltered and managed by my company.

One of my main goals is to get rid of the iPhone and personal computers. I have a work computer that is heavily monitored, and that could be used for valid reasons. If I ever looked at porn on it, the company would know in a minute. The iPhone is not monitored and is the source of many of my problems.

Best of luck

“The company would know”, and..? Would they care?
