

Bruce's Battle

Posted by BruceWayne - 17 Jun 2009 14:30

OK guys, it took me a little while but I'm finally up on this part of the forum. Most of you probably know who I am by now, so I won't repeat my story. You can find that and a bunch of other stuff at my original thread here: rehab-my-site.com/guardureyes/forum/index.php?topic=503.0

I will be posting my progress towards 90 clean days almost every day here. Updates will be right before I go to sleep, once the day's victory is secure, or the next morning.

This thread is really for myself. I don't care if no one reads it. It's here to keep me accountable and to help me get there.

So far I have been clean for 4 days. Today will hopefully be number 5.

I'll say it to me, OK? ...here goes:

I'm not really struggling with myself, I'm struggling with a 400lb gorilla. To hell with me and my farshtunkeneh struggle, go now and get some help and get out of this head!

Tzeh - ul'mad...gotta **go out** to learn anything **new**. The **old** thinking I'm fighting "myself" with was the same crapola that got me into this fix in the first place. No? Uh oh.....

Don't worry Dov, I didn't quote you today. It's "safe" for you to read.
I've been meaning to say,

bruce haven't you had a long enough vacation?

coming back anytime soon?

Yes.

And I would hardly call it a vacation. Vacations are fun....

how did i miss bruce's post?

Time for science jokes
listen to trying. she's seriously scary.

and i think she's getting tired of all the flakiness.

no bio jokes this time.

Did you hear the one about the statistician?

Probably....

A mathematician and a...eh...non-mathematician are sitting in an airport hall waiting for their

flight to go. The non has terrible flight panic. "Hey, don't worry, it's just every 10000th flight that crashes." "1:10000? So much? Then it surely will be mine!" "Well, there is an easy way out. Simply take the next plane. It's much more probable that you go from a crashing to a non-crashing plane than the other way round. So you are already at 1:10000 squared."

(I might add that the mathematicians flight got abducted by some aliens doing some nasty experiments on him, which proves that poking fun at somebody else is much more fun than poking fun on you :-)

A statistician can have his head in an oven and his feet in ice, and
he will say that on the average he feels fine.

I can travel through time and I do ... at the unremarkable rate of one
second per second.

The problem with entropy is that it's always breaking down.

A day without fusion is like a day without sunshine.

The vet at the zoo had a problem: beryllium. He had only two options, to
curium or to barium. He lead the dentist to boron the bear's tooth. I'd
give a nickel to have seen what happened when the bear woke up. Now the
vet and the dentist argon. It's ironic what can happen when you have a

beryllium and try to curium.

My name is Bond, Ionic Bond;

Taken, not shared!

Q: What do you get if you chop an Avogadro up into 6.02×10^{23} pieces?

A: Guaca-MOLE!

It's good to be back.

I was gone longer that I wanted to be because I got caught up in a lot of work.

I learned a few important things.

On topic for you science folks, I found two really good videos that explain the neurobiology of addictions. Hit home for me. Each one is about ten minutes long.

Somebody didn't read my post in the Break Free section....

That was long.

You guys are going to have to flakify me before I post a page long rambling.

OR, you'll get it when I hit 90 days. Too bad I'm not counting these days....
