

GYE CHATROOMS - LOOKING FOR BETA TESTERS

Posted by the.guard - 19 Nov 2011 21:36

GOOD NEWS! The long-awaited GYE chatrooms should be functional!

If you want to help us test it and give us feedback, here's what you need to do:

1) Go to: guardyoureyes.com

2) Click on Tools > Chatrooms

3) If you're an old timer on the forum (about 6 months ago), log in with your username and password. If not, click register and make a new username and password.

4) Once your registered, we will have to verify you for chatting. Since chatting is more intimate than posting, we have to be extra careful about gender separation. To use chat, you need to have a separate verification. Send us an e-mail to gye.help@gmail.com with your username and if we know that you are male, we'll give you access.

5) Once we verify you for chat, you will be able to use it with anyone else who is online.

There is both public chat and private. Public chat can be seen by anyone online. Private chat is one-on-one chatting between members.

There are even special chat-room groups, for example "Married Men". If you are married, you will be given access to this group and can chat with other members in this group about marriage issues.

NOTE: To chat with someone privately, just click on their name in the public chat window

and a new private chat window will open.

Simple steps to have GYE chatrooms running as a separate application.

1. Download the latest Google Chrome browser.
2. Go to the chatrooms and log-in.
3. Go to Settings (the wrench on the top right) -> Tools -> Create Application Shortcuts.
4. Make shortcuts on your desktop, start-menu, etc...
5. Just click on the shortcut when you want to chat (even if you usually use another browser for your surfing).

R' Guard,

I just have a request for the programmers.

If you are the only one in the chat room it is pretty lonely.

But I like to keep the chat room tab open in the hope that someone will show up to shmooze and I will be able to stop working and start shmoozing.

It would be usefful if the tab for the chat room would flash or something, whenever a new user logs in or something like that.

This way I could do my work without having to worry that maybe someone will check into the chat room and I will miss them.

[lo yichra wrote on 21 Nov 2011 22:08:](#)

but we wanna make a chat of 3 people together,

is it possible?

I have the same question, can 3-4 people have together a private conversation ? withou being on the full public ?

People can have a 1 on 1 private chat, or a public chat... but there is no way to have 3-4 people

privately unless they are in a special chatroom, which we can create for this purpose. For example, we can create a special room called "Dov's Group" where all members of Dov's group would be added into our system and be able to chat there privately. It is similar to the "Married" chatroom, which only married people can chat in.

By the way, have you tried the private chat feature yet? Is anyone having problems with it?

(11:12:32) shteeble: geshmak

(11:14:24) shteeble: i just started a new thread in having fun...section.... to get this place rollin

(11:14:30) shteeble: hey

(11:14:35) shteeble: why isn't this working??

(11:15:20) shteeble: i had to reload the page to see the last couple of things that i typed.

I've not tried private chat yet, but can't you have more than one private chats going on at once? Than you can do three people together, as long as you're connected "zugim zugim". Does that make any sense?

at 57 minutes past the hour, as I was chatting, I got like ten messages within two seconds:

Connection Error: 500, and then as I was playing with settings, changing sounds etc, it went on to a next page with the following message:

Warning: Invalid argument supplied for foreach() in
/home/gyemedia/public_html/live/components/com_ajaxchat/lib/class/CustomAJAXChat.php on line **321**

Query: SELECT userID, userName, userRole, channel, UNIX_TIMESTAMP(dateTime) AS timeStamp, ip FROM jos_ajax_chat_online WHERE sex='1' GROUP BY userName ORDER BY userName; Error-Report: MySQL server has gone away Error-Code: 2006

If /when I get in a chat room, is there anyone from Eretz Yisroel to chat with or do I have to wait until the night?

wow, thanks guard! can't wait until we have GYE facebook and twitter!

this is so nuts! whoooopeeeeeeeeeeeee!

GYE has a Twitter account, and a LinkedIn group for those who don't want anonymity. I wonder how many people are in the LinkedIn group. ;D

I tried it.

the connection on the new site untill it opens the chat screen is slow. but once i get to the chat screen, it works very well.

i tried both the privte chat and the public chat and it works well, fast, easy to use, the sounds are very good. momesh perfect.

Google chat has a option that in a private chat you can add people, so, 3 or 4 people can chat together privetely. I wonder if you can look into adding this feature here. Dov has a big group, but, there are many other small group working on getting clean together, i dont think GYE can afford to make for every 3-4 people that ask a public group, so, the option of adding people to a private chat would be appreciated.

Thank you Heliga Guard for all you do for all of us and for listening to our opinions.

Since Gmail is the most popular for GYE users, small groups can use Google chat until GYE is fully functional.

If you use Yahoo, switch to Gmail now. It is must cleaner than Yahoo. No one is trending and you can log in and out without being subject to all the shmutz.

Just tried to log in to chatroom with firefox, got the following:

Internal Server Error

The server encountered an internal error or misconfiguration and was unable to complete your request.

Please contact the server administrator, webmaster@gye.mediamaxgroup.com and inform them of the time the error occurred, and anything you might have done that may have caused the error.

More information about this error may be available in the server error log.

Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request.
