

GYE GOES MOBILE!!

Posted by the.guard - 10 Sep 2014 22:20

Great news! GYE's website is now MOBILE FRIENDLY and RESPONSIVE (meaning that the web-pages shrink to fit smaller screens). For the first time, users can use their smart phones to register on GYE, log in, browse the home-page, the articles, chat in the mobile chat-rooms, use the forums, and take advantage of the personal home-page - all from your phone!

There are still some bugs that are being worked on, and a few pages and features that aren't fully mobile-friendly yet (like the phone conferences page). We are looking for feedback please. If you have a smartphone, please try and use the website and features from your phone and send us notes on the bugs you find. Thank you!
