Talking about the app, is there any plan to update the app? Some of the links don't work anymore, and the app is very buggy and crashes pretty often (especially when trying to cut or paste)

I'm using the Android app

Are the apps online nowadays? Is there any plan to add them back on if not?

I have the same question as @strugglingwithmyself, are the apps going to available anytime soon for those who weren't able to download it during its initial releases? Are they in the process of getting upgraded?
